**NOTIFICATION OF POSITION OPPORTUNITY
QUALITY ASSURANCE INSPECTOR**

Position reports to Quality Assurance Supervisor.
This is a non-exempt position at Grade 27

General Responsibilities:

Responsible for all phases of quality assurance and control, coordinate inspections, work with customer QAR's and prepare quality document packages. This includes but is not limited to performing receiving, in-process and final inspections. Must coordinate with vendors/suppliers and appropriate personnel to define and control non-conforming material and effect remedial action or replacement of defective material or equipment. Calibrates inspection gauges and instruments using established procedures. Assists customers' Quality Representatives in performance of inspection and quality checks as required. Responsibility includes maintaining appropriate records of inspections and remedial actions.

Qualifications:

High School graduate or equivalent with five years experience in all phases of inspection. 2-year Technical Degree a plus. Weld Inspection and NDT Certifications are also pluses. Solid experience in mechanical and fabricated parts inspection. Must have strong mathematical aptitude; ability to interpret drawings; and write reports. Must have working knowledge of QA Procedures, Government regulations in quality and general procedures, plus good knowledge of ISO9001 requirements. CMM experience preferred. Must be computer literate.

The ability to effectively communicate and interface with all appropriate personnel to resolve existing problems and avert potential problems is essential.

If you are interested in this position, please email or fax to the attention of the Human Resource Department a resume with cover letter indicating desired salary requirement.
